

WHAT IS CLAIMED IS:

1. An aqueous- or solvent-based, one-component, polyurethane stoving coating composition comprising
- 5 i) a polyisocyanate blocked with a CH-acidic ester, ii) OH-containing polymeric compound, and iii) 0.5 to 4.0 wt.%, based on the solids content of components i) and ii), of a tetravalent titanium compound.
2. The stoving coating composition of Claim 1 wherein component i) comprises a polyisocyanate blocked with a malonic ester.
- 10 3. The stoving coating composition of Claim 1 wherein the tetravalent titanium compound comprises tetra-n-butyl titanate.
4. The stoving coating composition of Claim 2 wherein the tetravalent titanium compound comprises tetra-n-butyl titanate.
- 15 5. A plastic, metal, wood, paper, ceramic, mineral or glass substrate coated with the stoving coating composition of Claim 1.
